

# Sofía Fernandez Stenström

## Light and form

SOLO SHOW | ONLINE [VR]  
1 - 31 May 2024

Born in Stockholm in 1974, Sofia Fernandez Stenström spent her childhood between Sweden and Spain, a duality that made her interest in photography emerge as a need to communicate the contrasts and search for identity. After studying Arts in London and becoming a mother, she began developing her photography, exploring her body and capturing the emotional response.

Sofia believes in experiencing photography rather than just analysing it. "Photography must be felt, not read or explained" is the idea on which the photographer bases her work: she sees it as a personal exchange between herself and the model, shedding any pretence, where they both reveal their emotions and connect to create images with a powerful feminine quality.

A subtle union that is hard to translate into words, and Sofia beautifully reflects in her photographs.
